Summer TA % effort and stipend payment is dependent upon the total number of hours the TA works during their appointment and may differ from effort allocation used during the academic year. The stipend is based on the total number of hours the TA works during the assigned session and is indicated in orange in the table above. For example, a TA working 10 hours/week during the 4-week session will work a total of 40 hours during their appointment. This equates to a payment of \$1,091.25 and 25% effort.
